Learn basics of the
Stock Market

**Knowledge
For Bright Future**

About Course

Everyone is keen on having financial growth, and investing seems like a lucrative path, at the peril of risks. The risk factor of trading and investing makes it a little daunting for novices. To help you with the foundational learnings required before trading in the Stock Market, we have designed this Basic Stock Market Course, where you will get to understand the basics of the Stock Market, working of stocks, Capital Market, Derivatives Market, future options, and live trading. This course has been designed to build a strong launching pad for individuals passionate about learning the trade.

Learning Outcomes

- You'll gain an understanding of the capital market, including the primary and secondary markets and their part in raising capital and easing trading.
- You'll be suitable to identify and explain the major market actors and understand their places in the request.
- You'll get to know about major stock exchanges and market indicators and understand their function as pointers for market performance.
- You'll gain knowledge about legal and non-supervisory aspects of the capital market, like crucial laws, rules, and regulations governing trading and investor protection.
- You'll be suitable to understand the post-trading processes, including clearing and agreement, and how trades are reused and settled.
- You'll be introduced to different trading styles and software operations used in the market, similar to ODIN, NEAT, and NOW, enabling them to acclimatize to different trading surroundings.
